

LESS IS MORE ANY TIME OF THE YEAR

Using less water means more water in Lake Mendocino, Lake Sonoma and the Russian River. We rely on these sources for drinking water, wildlife habitat and recreational activities.

Use less water today by following these tips:

- **Inspect your irrigation system for leaks or malfunctions. Find and repair any leaks immediately.**
- **Get a \$150 rebate for replacing your old 3.5-gallon-per-flush toilets with new high-efficiency toilet (HETs). Contact your water provider for specific program requirements.**
- **Apply 3 inches of mulch, such as wood chips, bark, pine needles, or compost, around the base of plants to retain moisture and prevent evaporation.**
